

# Quarter Hand Pallet Truck

Painted quarter pallet truck.

This little quarter pallet truck is mainly made for warehouses, where it can be used for display pallets. It drives perfectly between the racks in the warehouse, without taking space, and not bothering the customers.

The truck is made in painted steel, it is good and stable to drive with, and it won't take much space. It is easy to maneuver with and is very silent.

# Specifications

# Type OA-300

The Quarter Hand Pallet Truck is made of steel in high quality, and as well the axle, screws, nuts and split pins are as well made in high quality steel.

The Quarter Hand Pallet Truck, has a closed hydraulic system, there are safe and secure. The polished pistons and cylinders secure a long lifetime. The release handle are placed in the handle, there at the same time is used for pumping up the forks, with a single/simple grip on the release handle you can lower the load slowly or fast, depending on how much you push the release handle.

The pump cylinder contains permanent quick lift which in first pumpstroke can lift the pallet from the ground.
